## SUMMARY

Starting from a single idea and bringing it to reality, that is what a job of a developer is. I am proud to say that I was able to bring many such ideas into practical web and native applications by leveraging different web and native technologies. I have contributed to 20+ websites, web apps, and native apps. The skills like UI and UX designing always gave upper hand to my development work by making it attractive and usable at the same time. I am aspired to work with people as excited about the Web-Development as me.

## EXPERIENCE

### Full Stack Developer

Feb 2021 - Present

TCS, Pune (1.4 years)

- Created React Apps, Static, and Dynamic web applications.
